

Assignment 2 – User Personas for Dog Adoption Platform

Objective: Create three fictional user personas representing different target users of a dog adoption platform.

Persona 1 – Teenager Who Loves to Raise a Dog

Display Picture

Name	Ananya Sharma
Age	17 years
Occupation	School Student
Tech Friendliness	High

About the User

Ananya is a 17-year-old school student who loves animals, especially dogs. She has always wanted to raise a dog and regularly watches dog-care videos on social media. She wants to adopt a friendly dog from a shelter instead of buying one. She is interested in learning about dog food, vaccination, grooming, and basic training.

Current Problems / Pain Points

- Her parents are concerned about the responsibility and cost of raising a dog.
- She does not know where to find genuine dogs available for adoption.
- It is difficult to compare different dogs.
- She needs clear information about a dog's age, breed, health, and vaccination status.
- She wants an easy way to contact shelters.
- She needs guidance about caring for a newly adopted dog.

What the User Needs

- Easy dog search and filtering.
- Detailed dog profiles.
- Health and vaccination information.
- Adoption requirements explained clearly.
- Dog-care guidance.

- Easy communication with shelters.

Persona 2 – Dog Lover Who Strongly Wants to Own a Dog

Display Picture

Name	Rahul Verma
Age	28 years
Occupation	Software Engineer
Tech Friendliness	High

About the User

Rahul is a working professional and a passionate dog lover. He has wanted to own a dog for several years and is now financially and personally prepared to adopt one. He prefers adoption because he wants to give a rescued dog a safe and loving home. He wants to understand the dog's health, behavior, and care requirements before adopting.

Current Problems / Pain Points

- Finding reliable adoption centers is difficult.
- Dog information is often incomplete or outdated.
- He cannot easily check the dog's medical history.
- Adoption procedures can be lengthy and confusing.
- He has limited time because of his work schedule.
- He wants to know whether a dog's personality and activity level match his lifestyle.
- He needs information about future maintenance and veterinary care.

What the User Needs

- Verified shelter listings.
- Detailed dog profiles.
- Medical and vaccination records.
- Search filters based on age, size, breed, and location.
- Online adoption application.
- Adoption status tracking.

- Information about food, grooming, training, and maintenance.

Persona 3 – Older Adult Looking for a Dog as a Companion

Display Picture

Name	Suresh Rao
Age	67 years
Occupation	Retired Government Employee
Tech Friendliness	Medium

About the User

Suresh is a retired government employee who lives with his wife. After retirement, he has more free time and would like to have a dog as a companion. He prefers a calm, friendly, and easy-to-care-for dog. He wants to adopt an older or well-trained dog rather than a very young puppy.

Current Problems / Pain Points

- He finds some adoption websites difficult to navigate.
- He is unsure which dog would be suitable for his age and lifestyle.
- He needs clear information about the dog's health and behavior.
- He is concerned about medical and maintenance costs.
- He wants a dog that does not require excessive physical activity.
- He may need assistance while completing the online adoption process.
- He wants reliable contact with the shelter after adoption.

What the User Needs

- Simple and easy-to-use interface.
- Large, readable text and clear buttons.
- Filters for calm, trained, and low-maintenance dogs.
- Complete health and vaccination records.
- Information about food and medical expenses.
- Shelter contact details.
- Post-adoption support.

Persona Comparison

Feature	Ananya	Rahul	Suresh
Age	17	28	67
Occupation	Student	Software Engineer	Retired
Tech Friendliness	High	High	Medium
Main Goal	Raise a dog	Own and care for a dog	Find companionship
Main Concern	Family approval & care	Health & time	Health & maintenance
Important Feature	Dog profiles & guidance	Medical records & adoption process	Simple interface & suitable dogs

Conclusion

These three personas represent different types of users who may use the dog adoption platform. Ananya needs guidance and family-friendly information, Rahul needs detailed information and an efficient adoption process, while Suresh needs a simple interface and a suitable companion dog. Understanding these users will help in designing a platform that is easy to use, trustworthy, accessible, and useful for both adopters and animal protection organizations.
